Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Storypoints)

Date	22 October 2022
Team ID	PNT2022TMID05841
Project Name	Car Resale Value Prediction
Maximum Marks	8 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	5551 5551, 7 1551		Story Points	Priority	Team Members
Sprint-1	Pre-process data	USN-1	Collect Dataset	1	Low	Ragunath
Sprint-1		USN-2	Import required libraries	1	Low	Sanjay
Sprint-1		USN-3	Read and clean data sets	2	Low	Ragunath
Sprint-2	Model building	USN-1	Split data into independent and dependent variables	3	Medium	Nikethan
Sprint-2		USN-2	Apply using regression model	3	Medium	Vignesh
Sprint-3	Application building	USN-1	Build python flask application and HTML page	5	High	Sanjay & Ragunath
Sprint-3		USN-2	Execute and test	5	High	Vignesh
Sprint-4	Training the model	USN-1	Train machine learning model	5	High	vignesh& Nikethan
Sprint-4		USN-2	Integrate flask	5	High	Ragunath

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	20	05 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	20	12 Nov 2022
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	20	19 Nov 2022

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{sprint\ duration}{velocity} = \frac{20}{10} = 2$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

CAR-1 Data set collection about second hand cars																										
CAR-2 import required libraries																										
CAR-3 read dataset																										
CAR-4 clean dataset																										
CAR-5 split data into independent and dependent v																										
CAR-6 Apply using regression model																										
CAR-7 Build python flask application																										
CAR-8 Build HTML page																										
★ CAR-9 Execute and Test																										
CAR-10 Train Machine Learning model																										
CAR-11 Integrate flask
